EDUCATION

Lebanese University

2023 – 2026

Bachelor of Science in Computer Science (Graduated)

TECHNICAL SKILLS

Programming	Java, JavaScript, PHP, C, SQL
Web & Mobile	HTML5, CSS3, XML, Android Studio
Cloud & Tools	AWS, Git, GitHub, Linux CLI, VS Code
Databases	MySQL, SQLite, Relational Design
Languages	Arabic (Native), English (Fluent)

PROJECTS

BuildYourFlag (Android Shopping Application)

Java, XML, SQLite

- Designed and developed a mobile commerce application layout in Android Studio using custom Java classes and XML configurations.
- Implemented inventory management, shopping cart functionality, and persistent local database storage using SQLite.
- Managed CRUD operations and real-time catalog updates, utilizing AI-assisted diagnostics to optimize database logic.

Multi-Vendor E-Commerce Platform

PHP, MySQL

- Designed and built a web-based e-commerce platform incorporating a multi-vendor database structure.
- Developed backend transactional APIs specifically for Safe Checkout and comprehensive inventory management.
- Implemented user sessions, product catalogs, category management, and secure form validation.

Booking Platform

- Developed a service-booking system featuring structured form processing, server-side validation, and reliable database workflows.

Netflix Clone Web Application

HTML, CSS, JavaScript

- Created a responsive frontend clone optimized for cross-browser compatibility and mobile responsiveness.

CERTIFICATIONS & ACTIVITIES

- AWS re/Start Graduate (400 Hours):** Intensive training in Cloud Infrastructure, IAM, Networking, Security, and Deployment.
- Machine Learning Certificate**
- Problem Solving Competition Participant:** Strengthened algorithmic thinking, debugging efficiency, and optimization skills through time-constrained coding challenges.
